

IN THE DRAWINGS:

See the revised drawings Figure 44A, Figure 44B and Figure 45.

REMARKS

In response to the Notice of Drawing Inconsistency, the Specification and Drawings have been reviewed and there was an error in the identification of the respective Figure 44, Figure 45A, and Figure 45B.

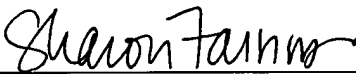

Basically, the model representation of the transport stream, which is multiplexed, is Figure 45 per the amended Drawings and amended Specification. Thus, Page 177 discloses the transport stream 3501 in Figure 45, the generated PMT 3401 is shown as Figure 44A, and the Entry_descriptor 3402 is shown in Figure 44B. These amendments have been added to the Specification.

As can be determined, these issues do not affect the patentability of the claims, nor add any new matter, but rather correct minor typographical errors.

If there are any questions, the undersigned attorney can be contacted at the listed phone number.

I hereby certify that this correspondence is being deposited with the U.S. Postal Service as first class mail in an envelope addressed to: Mail Stop Issue Fee, Commissioner for Patent, PO Box 1450, Alexandria, VA 22313-1450, on May 3, 2006
